Sailing News

I hoped it would be sunny and warm last Sunday for sailing and paddling, but little did I know Saturday would have been the coldest May day recorded.

Despite that, there were a number of club members keen to get out on the water on Sunday, but when the time came to get into the windy westerly conditions, everyone seemed to be happier to catch up with the members on land instead.

There is a good tide at 9:30am on Sunday, June 7 and I hope it will be warm and sunny.
